

In addition to Electrolysis (permanent hair removal), waxing, and piercing, Bare Facts also offers the latest skincare techniques with the most exceptional, science-based products in the beauty business! We use Environ medical-grade skincare from Dr. Des Fernandes, whose celebrity fans include Kate Winslet, Elle McPherson, Sienna Miller, Naomi Watts, Michelle Williams, and top beauty editors around the world! You'll find Environ in the top spas like Canyon Ranch and all luxury cruise ships!

We choose to work with Environ skin care products because we like results. Environ makes a difference and time after time the therapist, research, and clients all stand by the product. Environ makes a difference; they have created a revolution in the world of beauty. The key ingredient which they stand by is the intensive use of Vitamin A. I haven't found another company that uses a better active component of Vitamin A in the same quantities as Environ. It is this approach that has enabled the amazing results that this range of skin care products achieves. Environ products have a unique way of smoothing the skin and protecting it from the harmful and skin aging UV rays. The use of Vitamin A also assists the self-generation of Collagen and a regeneration of Elastin making the skin look more youthful and healthier. Facilitated diffusion can use electrical, iontophoresis energy. In iontophoresis, this external source of energy is in the form of an applied direct electrical current. Iontophoresis is a non-invasive method of delivering these vitamins into our skin. With a low-level electrical current, iontophoresis repels the vitamins ions through the skin and into underlying tissue. The use of iontophoresis for transdermal vitamin serum delivery and drug delivery has been successfully used by medical professionals for decades and continues to increase dramatically because of its advantages.

Dr. Des Fernandes is a world-renowned plastic and reconstructive surgeon from Cape Town, South Africa, who formulated Environ skin care and also has pioneered the Micro-needler. He has created a series of them for different skin care concerns - Environ Cosmetic Roll-CIT, Medical Roll CIT, and a more intense version - the Environ Surgical Roll-CIT, a new treatment to help repair sun-damaged skin and reduce lines, scars, etc. Using a special roller containing hundreds of tiny needles, the epidermis is penetrated which is an alternative to harsh laser resurfacing which I'm not a fan of. It's cheaper, skin heals faster so less time off work, and there is no sun sensitivity.

Dr. Des Fernandes, an expert in treating sun damaged skin, developed the line, using a fatty form of nourishing vitamin A. The active ingredient performs as a miracle worker with anti-aging, anti-photodamage, and soothing abilities. The product enriches the skin with a powerful combination of antioxidants, penta-peptides, and vitamins to speed up restoration of skin cells, firm skin, and smooth out fine lines. As a result, the surface of the skin is refined and overall hydration is improved.

Based on the philosophy that vitamin A is the cornerstone for beautiful, healthy skin. By feeding the skin with adequate amounts of vitamins, radiance, and youthfulness can be restored.

Environ creates scientifically researched products that will dramatically transform your skin. Environ's vitamin ranges have been awarded the Swiss Vitamin Institute logo, which verifies that the products tested (never on animals) contain the highest vitamin strength declared. Environ brings your skin back to beautiful. Vita Peptide C-Quence line, a step-up system, a luxurious gel that Dolce & Gabbana have both said "gives you flawless skin."

## Facial Product Information

### ***Alginate mask***

The Environ alginate mask is for all skin types. It's ingredients are algin, calcium, silica, and earth minerals. It aids to deepen the penetration of minerals vitamins and serums and reduce redness, smooths rough skin, lifts, tightens plumps and aids in healing. Algin (alginic acid) takes the molecules of these luxurious vitamins and serums, ionizes them (meaning penetrate) into the skin. Alginates are refined from brown seaweeds. A wide variety of brown seaweeds of the phylum Phaeophyceae are harvested throughout the world to be converted into the raw material commonly known as sodium alginate. Alginic acid, also called algin or alginate, is an anionic polysaccharide distributed widely in the cell walls brown algae where through binding with water it forms a viscous gum. We utilize alginate for its means of gelling. Alginate is both food and skin safe. This unique substance is used in the production of cosmetics and foods. Brown algae in their composition are unmatched among any animal or plant among the world precisely because they contain alginate acid and its salts (ammonium, sodium, calcium and potassium). Algin in the use of face masks - one of the most common and effective means of skin care products. They contribute to the nutrition, hydration, rejuvenation, toning and cleansing.

### ***Focus Frown Serum - No Botox Treatment Serum***

Avance-(Matrixly 3000, Trylagen Matrixyl Synthe6, Squalane) and Vitamin E, to combat UV damage and age spots, and promote extraordinary cell growth.

### ***Current***

A low level of electrical galvanic current also referred to as a modality phoresis. The process of forcing a water-based solution into the skin by applying galvanic current to the solution.

Desincrustation, a treatment in which blockages in the skin, such as clogged pores or blackheads, are broken down. Anaphoresis softens skin tissue, expands pores, increases blood flow, allows products to penetrate the skin. Getting deeper of an explanation; an atom, or molecule, with a negative charge is an anion. Because of their opposite electric charges, cations and anions attract each other and readily form ionic compounds, such as salts. (which in turn is the align mask) Ions can be created by chemical means, such as the dissolution of a salt into water, or by physical means, such as passing a direct current through a conducting solution, which will dissolve the anode via ionization. The alginate mask that is charged with a micro current, a unique service that drives vitamins deep into the skin through the newly needed channels.
